

Fallen Leaf Prints

This activity uses fallen leaves to create pieces for art by using the different shapes and patterns of the leaves to create prints.

1. **Gather your leaves**

Head outside and gather up as many different types of leaves as possible. Remember you should collect leaves that are already on the ground and not on the trees.

Dry your leaves before using. Once dry, add different colours of paint to one side of the leaf. Acrylic paint works best and remember you can use more than one colour on each leaf!

2. **Add Paint!**

3. **Print!**

Press your painted leaf firmly onto a white page to create your print.

Display

Why not label the different types of leaves used to make your print? Or create a leaf creature using leaves of all different shapes and sizes.

4.

This activity requires adult supervision and is recommended for KS1 or KS2.
